

INTRODUCING GLAZELITE XL™

by May Group USA

COMMUNICATE YOUR MESSAGE ON A GRAND SCALE

Glazelite XL™ is the newest in our line of illuminated signs. Ideal for large format advertising, wayfinding, exhibitions and branded environments.

MAKE A STATEMENT

The 95" X 47" illuminated faceplate is an ultra-thin acrylic, Full bleed HD digitally printed masterpiece. Surrounded and accented by a glowing edge of color (choose from red, green, blue or white).

Marketing Messages change and so can the faceplates. They're completely interchangeable and switching out is a breeze with no special tools required.

Beautiful LED edge light.

Vibrant HD digital printed faceplate that's interchangeable.

LIGHT AND BRIGHT

Light, because of the ultra-thin acrylic construction. Weighing only 120 pounds, makes it easy to wall mount or stud mount, and can be oriented horizontally or vertically.

Bright, because we use LED illumination combined with special etching, we developed to provide even light distribution at 6,000K over 50,000 hours of LED life. Also, bright because it's very energy efficient and made right here in the USA!
